Hi Ruben,

I appreciate the thought, time and effort that went into this letter from Gloria, and it is a well-written and useful document.

It did not address my father's need, however, which is a statement from EPA amending its position expressed by Casey in her letter referenced by me in an earlier communication. I'll forward it again.

Please look over my communications regarding some exoneration letter for my father to share, something that states my father relied on assurance from EPA before representing Arkwood, however briefly, as ready for consideration by BFPPs for eminent return to productive use.

I think a simple letter from Gloria or Casey stating that due to then-unforeseen circumstances, and although EPA in good faith assured Bud Grisham he could look for BFPPs for Arkwood on the cusp of redevelopment, EPA since had to modify that position, the new EPA position is such-and-such, and Mr. Grisham (or Casey for that matter) could not be held responsible for those earlier representations because at the time all believed them to be true, based on available information.

See what I'm getting at? He needs a letter taking the onus of responsibility off him for the earlier mis-statements to prospects for Arkwood, because some of those people are his friends, the town can be gossipy, and because those were his best prospective BFPPs who we'll need to approach in the future again (hopefully...)

Thanks,

Curt
